You may know the « speakeasies » phenomenon. Approximately between 1920 and 1933, those illegal drinking spots began to emerge massively because of the Prohibition, encouraging the rise of criminal and gangs' activities. This is the consequence of prohibition legislations passed by the American state after the First World War.

You thought they only exist in the United States? Follow us! And discover in a small group the hidden face of Paris, unwonted places, which are often unknown by tourists, but also by Parisians themselves! A guide will accompany you during three hours, and will reveal you all the secrets our capital city may hide!
